

If we think more about the tone (how it speaks) of the AI, it will bring up the shape, colors, etc.

assistant
human

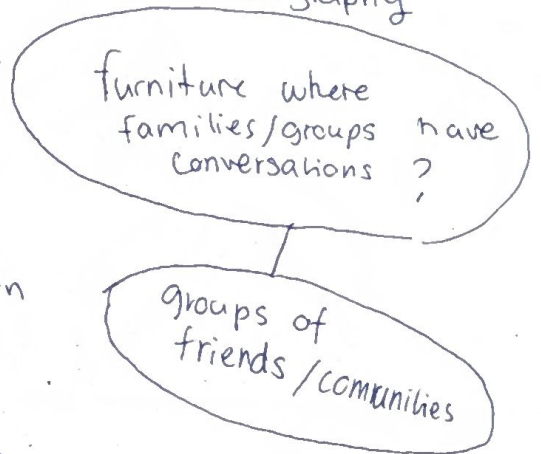

toy = funny
metal =
corporate = serious

Simplify ?

- Software Diagram — test AI locally
- make photos of user tests
- Plan B ? form of object
- thinking about project name
- planning who does what, when ?
- user journey → illustrations
- final form to prototype → cardboard
- what is printed on fax (transcription or just Dictionary ?)
- material Inter-generational [long life]
